Junjie Yu

YuJunjie-yjj@sjtu.edu.cn | junjieyu28.github.io | JunjieYu28

EDUCATION

Shanghai Jiao Tong University *Sep 2023 – Present*
BEng in Artificial Intelligence · Zhiyuan Honors Program *Shanghai, China*
Average Score: 89.34 / 100 · Rank: 35 / 98

PUBLICATIONS

- AcademiClaw: When Students Set Challenges for AI Agents.
  Junjie Yu, Pengrui Lu, Weiye Si, et al. *arXiv preprint*, 2026.
  The first academic-level benchmark for OpenClaw sourced directly from undergraduate students, comprising 80 complex tasks across 25+ domains to evaluate academic capabilities and contribute to the OpenClaw community.
- Speed by Simplicity: A Single-Stream Architecture for Fast Audio-Video Generative Foundation Model.
  arXiv preprint, 2026.
  The first open-source foundation model to achieve joint audio-video generation using a pure single-stream Transformer architecture, attaining 80% win rate over Ovi 1.1 and 60.9% over LTX 2.3 in human evaluation, reaching SOTA in open-source audio-video generation.

RESEARCH EXPERIENCE

Research Internship *Dec 2025 – Present*
SJTU & SII – GAIR Lab · Mentor: Pengfei Liu *Shanghai, China*

- Currently researching the cyber security capabilities of large language models.
- First author & Project leader of **AcademiClaw**, a benchmark for OpenClaw.
- Participant in **davinci-magihuman**.
- Built downstream applications based on davinci-magihuman, including digital human meetings and digital human live streaming. [Soon Public]
- Participated in the development of **Wesay** (a speech recognition app). [Private Repo]

Research Internship *Mar 2025 – Dec 2025*
SJTU – Artificial Intelligence Institute, DeepVision Lab · Mentor: Wei Shen *Shanghai, China*

- Conducting research on **MultiModal Large Language Model**.
- Participated in training a GUI recognition model for future GUI Agent (collaborative project with Huawei). Responsible for data synthesis, annotation, and cleaning.
- Conducting research on **visual token pruning** for multimodal models.

PROJECTS

AcademiClaw | The first academic-level benchmark for OpenClaw sourced from undergraduate students. *Python*

Paper-RAG | An intent-aware paper recommendation and research assistant powered by RAG. *Python*

GUI-Project | Data preparation for training a GUI recognition model for future GUI Agent. *Python*

ViT-on-Image-Classification | ViT on image classification, esp. small-scale datasets (CIFAR-10). *Jupyter Notebook*

HONORS & AWARDS

Zhiyuan Honors Scholarship 2023, 2024, 2025
Award for top students majoring in science.

Undergraduate Excellence Scholarship 2024, 2025
Awarded to students with outstanding comprehensive evaluation rankings.

MCM/ICM Honorable Mention 2024
Mathematical Contest in Modeling, administered by COMAP.

RESEARCH INTERESTS

Cyber Security, Large Language Model, Agent, AI for Games
Current Focus: Cyber Security & LLM

SKILLS

Programming Python, C++
Agent Codex, Claude Code, OpenClaw
Tools Git, Linux, LaTeX, Docker, PyTorch
Languages Chinese (native), English (fluent)
